🎓 EDUCATION

Bachelor of Computer Applications (BCA),

Contai College of Learning & Management Science

09/2023 – Present | Contai, West Bengal

Higher Secondary, Ganeshwarpur D.H High School

01/2015 – 06/2023 | Ganeshwarpur, West Bengal

🧠 SKILLS

Programming

JavaScript (ES6+), Python, C, Java

Frontend

HTML5, CSS3, JavaScript, React.js

Backend & Database

- Node.js (Core Strength), Express.js, Middleware, Routing
- MongoDB, MySQL

Core Computer Science Concepts

- Data Structures & Algorithms
- Object Oriented Programming(OOP)
- Operating Systems, DBMS

Tools

- Git & GitHub, VS Code, Nodemon
- Windows & Linux OS, Command Line (CLI)
- Postman API testing

🔑 HOBBIES & INTERESTS

Coding and Building Web Applications

Passionate about creating projects and solving problems with full-stack development.

Exploring New Web Technologies

Enjoy learning and experimenting with the latest frameworks to stay updated.

🌐 LANGUAGES

Bengali — (Native/fluent) | **English** — (Fluent) | **Hindi** — (Fluent)

📋 SUMMARY

Hardworking and eager BCA graduate with a strong interest in backend development using Node.js. I have experience creating REST APIs, connecting to databases, and using tools like Express.js, MongoDB, and JWT for secure user systems. I'm also comfortable with frontend tools like HTML, CSS, JavaScript, and React.js. Looking to join a team where I can learn more, grow my skills, and help build useful web applications.

📁 PROJECTS

Full-Stack Chat & Video Call Application,

<https://batchit-2jxo.onrender.com/>

2025 – 12/2025

- Enabled real-time video calling and messaging using Stream API.
- Implemented middleware for error handling and validation to ensure smooth application functionality.
- Full-stack video calling and chat app with real-time communication via Stream API.
- JWT authentication for secure login and session management.
- Responsive UI built with React, Tailwind CSS, and Daisy UI.

Voting System -API,

<https://github.com/deepguchhait1/Voting-System-API.git>

08/2025 – 12/2025

- Developed a secure RESTful Voting System API for managing users, candidates, and votes.
- Implemented JWT-based authentication and role-based authorization (Admin/Voter).
- Built CRUD APIs for candidate and election management with MVC architecture.
- Ensured one-user-one-vote integrity using server-side validation and database constraints.
- Integrated MongoDB for efficient data storage, aggregation, and real-time vote counting.
